Hose Assemblies

Leaders in Hydraulic & Industrial Hose Assemblies

When it comes to hydraulic, pneumatic, and industrial hose assemblies, Custom Hydraulics and Design can help. We have cultivated a reputation for developing high-quality hose assemblies that are not just built to function, but to last, even under the most demanding conditions.

Delivering robust solutions is not just about expertise; it is about having the right tools:

Production Assembly Shop

Multiple accurate high speed assembly machines with crimp capacity up to 10" Hose I.D.

Weld & Fabrication Shop

Fixture tables for metal hose assemblies.

Seamless Integration with Component Kits

For those who prioritize precision and efficiency in their production or maintenance operations, we provide custom component kits. Crafted with an unwavering commitment to quality, each kit ensures your operations are streamlined and efficient.

Save Time, Boost Efficiency

Everything you need, right when you need it. No need for sourcing individual components.

Minimize on Hand Stock

Say goodbye to unnecessary stockpile. Our kits are curated, so you have just the amount needed.

Precisely What is Needed

Each kit is tailored to provide exactly what's necessary. No clutter, no excess. Only efficiency.

Kitting Solutions

Labeling & Packaging

Seamless Integration with Component Kits

In today's competitive market, your brand's presentation and precision are paramount. Custom Hydraulics and Design is your ultimate partner in crafting top-tier private labeling and packaging solutions. Every detail, every barcode, every bag – perfectly aligned with your brand's vision and reputation.

Retail Bagging Solutions

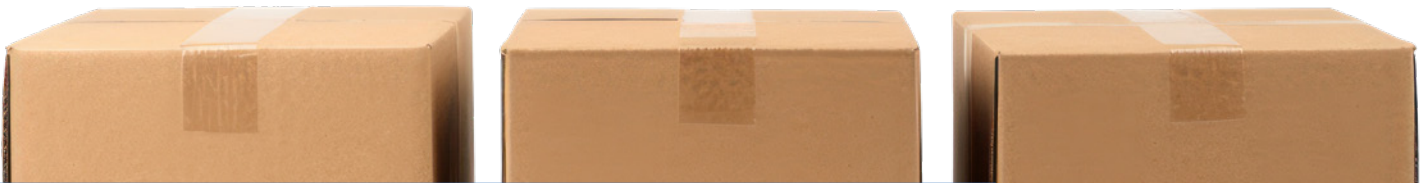

Elevate your retail presentation with packaging that resonates with your brand identity.

Components Bagging

Keep components safe, organized, and easily identifiable for maintenance, repair, or production.

Private Labeling & Barcoding

From branding, we cover all facets to ensure your products stand out always.

Engineering Excellence

When it comes to hydraulic and process systems, no one understands your needs better than we do. With an unwavering commitment to excellence, we specialize in developing high-quality systems tailored to your specific requirements.

Troubleshooting

Diagnose issues and solve inefficiencies using advanced tools and methods.

Optimization

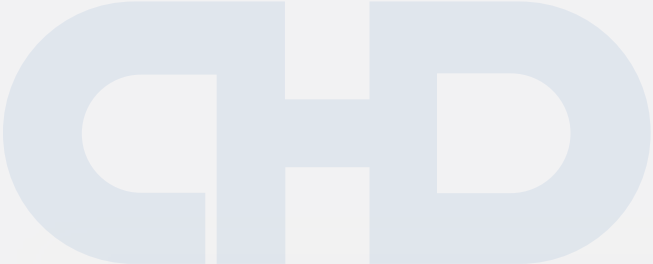

Define areas in need of optimization. Bringing new inefficiencies to old or out-dated systems and processes

Maintenance

Routine service of your critical systems insure peak performance is maintained.

Systems & Service

Tube Assemblies

Steel Tube Assemblies Made to Precision

When a flexible hose will not work, metal tube is your best option. From complex to simple, CHD offers manual and CNC bent tube assemblies. Manual tube bending up to 2 inches, and CNC tube bending up to 16 mm.

Unmatched Expertise

Years of experience catering to top-tier industries.

Advanced Machinery

Our tools ensure every piece is crafted to perfection.

Quality Assurance

Every assembly goes through rigorous quality checks.

Vendor Managed Inventory

Inventory Management Tailored to Your Needs

Rise above the rest using our Vendor Managed Inventory (VMI) services. Our solutions are meticulously designed to not just manage, but elevate your inventory processes. We ensure optimal stock levels, reducing your downtime and costs, while significantly boosting facility productivity.

Cost Efficiency

Optimized stock levels, ensuring you have just what you need, without the excess.

Streamlined Operations

Achieve consistent and reliable inventory when and where its needed.

Dedicated Service Team

A dedicated factory trained team who understands and manages your inventory needs.

Trained Service Team

Our team is Factory trained in fluid power and hydraulic
